## LARGE-AREA VENT

### VPVM

These technical conditions define a series of the manufactured sizes and versions of the following large-area vents (hereinafter vents): VPVM – K 400, 600, 800, 1000, 1200, 1480, VPVM – S 400, 600, 800, 1000, 1200, 1500, 2000, VPVM – R 800, 1000, 1200, 1400, 1600, 2000 , heights of 750, 1000, 1250, 1500 and 2000 mm. They apply to manufacturing, designing, ordering, deliveries, installation and operation.

**I. GENERAL**

**1. Description**

**1.1.** Large-area vents are terminal air-conditioning elements for the distribution of air in air-conditioned and ventilated rooms.

They are intended for the inlet of treated outdoor air directly into the living (working) area.

In order to ensure stabilized air flow in the living area, the temperature of inlet air must be lower by 1 to 3°C than the temperature of air in the ventilated room.

Outdoor air is let in with low velocity at the floor, to take harmful substances from the living area to ceiling.

**1.2.** The vents are intended for environment protected against weather impacts with the classification of climatic conditions class 3K5, without condensation, frost, ice formation, and without water even from other sources than rain according to EN 60 72133, change A2.

Air flow must have a temperature between -20 to +70 °C.

Vents are suitable for systems without abrasive, chemical and adhesive particles.

**1.3.** If is not noticed other way, all dimensions and weight are in millimeters and kilograms.

**2. Design**

**2.1.** The following types of vents are supplied: round outlets to be installed into a space, wall-mounted outlets with semi-circled ground plan, and corner vents with quarter-circled ground plan. Piping is connected to vents from above to round connecting socket. Vents are supplied with or without control flaps.

**3. Dimensions and weights**

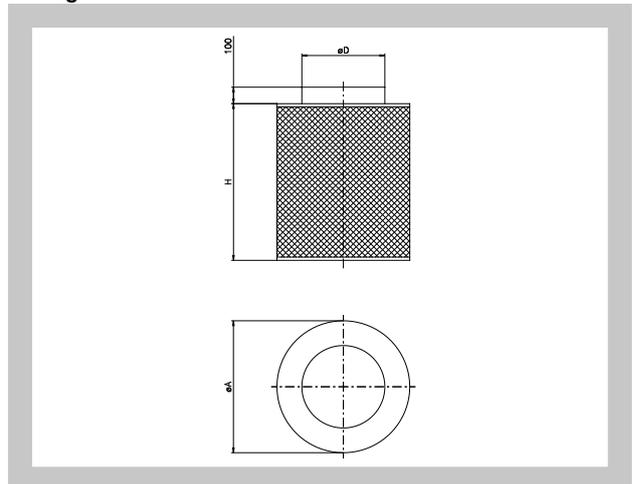

**3.1.** Dimensions

Tab. 3.1.1 Round vent VPVM - K

| Size | ØA   | ØD  |
|------|------|-----|
| 400  | 400  | 313 |
| 600  | 600  | 498 |
| 800  | 800  | 558 |
| 1000 | 1000 | 628 |
| 1200 | 1200 | 708 |
| 1480 | 1480 | 798 |

Height H: 750, 1000, 1250, 1500 and 2000 mm

3.2. Weights

Tab. 3.2.1. Weights [kg]

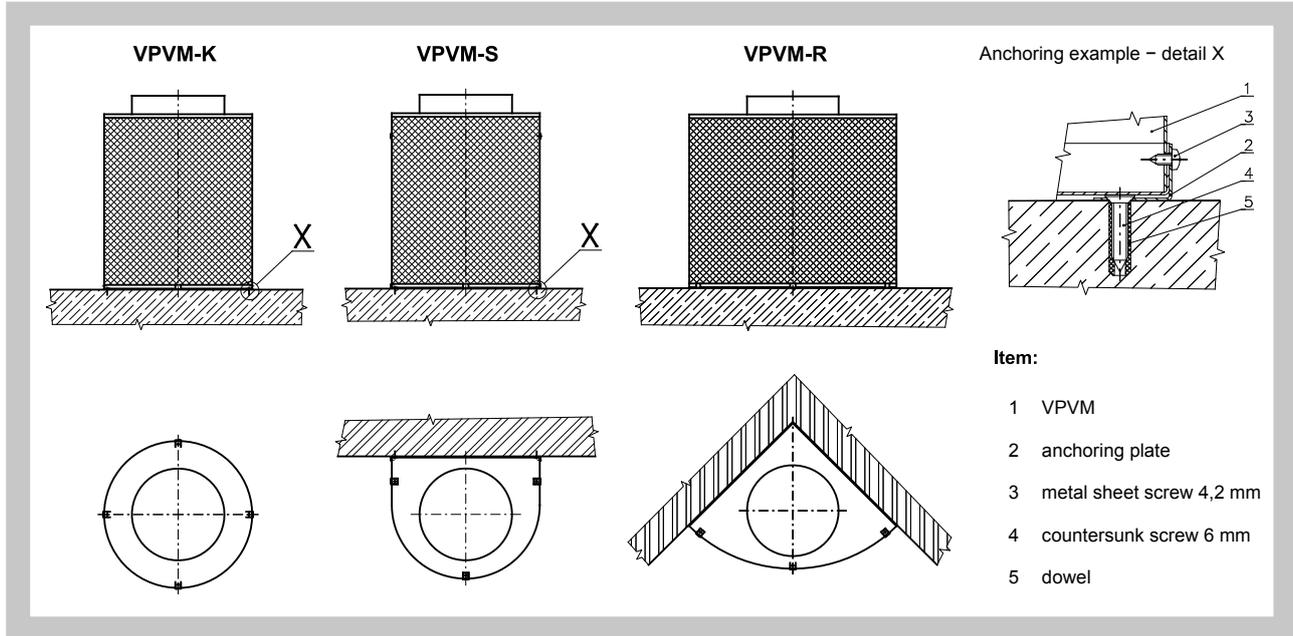

|        | Size | Vent height |      |      |      |       | Control |
|--------|------|-------------|------|------|------|-------|---------|
|        |      | 750         | 1000 | 1250 | 1500 | 2000  |         |
| VPVM-K | 400  | 8,8         | 11,0 | 13,0 | 14,5 | 18,5  | 0,8     |
|        | 600  | 14,0        | 17,0 | 20,0 | 23,0 | 29,0  | 1,7     |
|        | 800  | 20,0        | 24,0 | 27,0 | 31,0 | 38,0  | 2,0     |
|        | 1000 | 27,0        | 31,0 | 35,5 | 40,0 | 48,5  | 2,5     |
|        | 1200 | 35,0        | 40,0 | 45,0 | 50,0 | 60,0  | 3,0     |
|        | 1480 | 46,5        | 53,0 | 59,0 | 65,0 | 77,0  | 3,7     |
| VPVM-S | 400  | 11,0        | 13,0 | 16,0 | 18,5 | 24,0  | 0,6     |
|        | 600  | 17,0        | 21,0 | 25,0 | 29,0 | 37,0  | 1,2     |
|        | 800  | 21,0        | 26,0 | 30,0 | 35,0 | 44,0  | 1,4     |
|        | 1000 | 25,5        | 31,0 | 36,0 | 41,5 | 52,0  | 1,6     |
|        | 1200 | 30,5        | 36,5 | 43,0 | 49,0 | 61,0  | 2,0     |
|        | 1500 | 37,0        | 47,0 | 54,5 | 62,0 | 76,5  | 2,5     |
| VPVM-R | 2000 | 58,0        | 67,0 | 77,0 | 86,0 | 106,0 | 3,7     |
|        | 800  | 12,0        | 15,0 | 17,5 | 20,5 | 26,5  | 0,6     |
|        | 1000 | 15,0        | 19,0 | 22,5 | 26,0 | 33,5  | 0,8     |
|        | 1200 | 19,0        | 23,5 | 28,0 | 32,0 | 41,0  | 1,2     |
|        | 1400 | 23,0        | 28,0 | 33,0 | 38,0 | 48,5  | 1,4     |
|        | 1600 | 26,5        | 32,0 | 38,0 | 43,5 | 55,0  | 1,4     |
|        | 2000 | 35,0        | 42,0 | 49,0 | 56,0 | 70,0  | 1,7     |

Note: The weights provided apply to outlets without control equipment. For versions including control equipment, the weight of the control equipment has to be added.

**4. Placement and installation**

4.1. Round vents VPVM – K are intended for installation in free space, to be anchored to the floor. Wall-mounted vents VPVM – S and corner vents VPVM – R are installed onto walls and in corners, to be anchored either to the floor or to the wall (in the corner).

Fig. 4 Floor-mounting example

Large vent supply includes 6 anchoring plates (Pos. 2) and 6 metal-sheet screws, 4,2 mm (Pos. 3). Connecting material (Pos. 4 and 5) is not included in the supply.

**III. TECHNICAL DATA**

**5. Basic parameters**

5.1. Maximum air-flow through the vent

Tab. 5.1.1. Maximum air-flow through the vent  $\dot{V}$  [m<sup>3</sup>.h<sup>-1</sup>]

|        | Size | socket<br>ø D | Vent height H |      |      |      |      |
|--------|------|---------------|---------------|------|------|------|------|
|        |      |               | 750           | 1000 | 1250 | 1500 | 2000 |
| VPVM-K | 400  | 313           | 1250          | 1400 | 1500 | 1650 | 1800 |
|        | 600  | 498           | 2400          | 2600 | 2900 | 3100 | 3300 |

Chart 6.1.1. :  $\Delta p_c = 30 \text{ Pa}$   
 $L_{WA} = 23 \text{ dB(A)}$

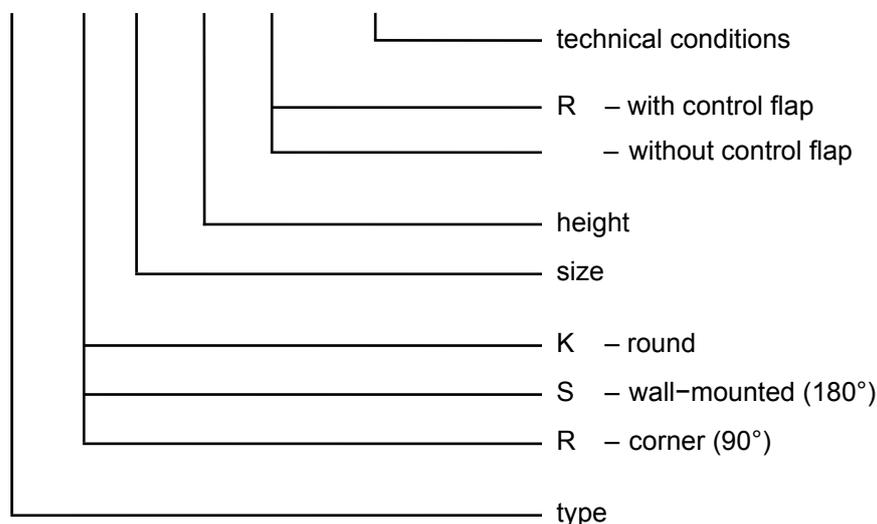

Chart 6.2.1. :  $L = 2,7 \text{ m}$   
 $\Delta t_L / \Delta t_P = 0,72$

Correction to outlet height  $\Delta t_L / \Delta t_P = 0,5$

## IV. ORDERING DATA

### 7. Ordering key

**VPVM - K 400x1000 R TPM 013/01**

## V. MATERIAL, FINISHING

### 8. Material

- 8.1.** Vent parts are made of steel sheet. The surface is finished with white baking varnish of RAL 9010 colour shade. Other shade requirements have to be agreed with the manufacturer in advance.

## VI. PACKING, TRANSPORT, STORAGE

### 9. Logistical data

- 9.1.** Vents are supplied in crates, covered with shrinkable foil, by covered transportation means. When handled during transport and storage, vents must be protected against mechanical damage.
- 9.2.** Provided no method of acceptance is determined in the order, vents will be considered accepted when being handed over to the carrier.
- 9.3.** Vents must be stored in covered rooms, in environments free from aggressive vapours, gases and dust. Temperature range of -5 to +40 °C and relative humidity up to 80% must be kept in the storage rooms.
