Rozhodnutí o autorizaci č. 32/2006 ze dne 31.8.2006

**Autorizovaná osoba 227**

# PRODUCT CERTIFICATE

**No. 227/C5/2019/0097**

In accordance with § 5 paragraph 2 of Government Regulation No. 163/2002 Coll. laying down technical requirements for selected construction products, as amended by Government Regulation No. 312/2005 and Government Regulation No. 215/2016, the authorised body confirms that for the construction product:

product name: **Modular air handling units MANDÍK series M, P, S, T and D**

intended use: Modular air handling units MADÍK series M, P, S, T and D are designed for air transport and treatment in low and high pressure ventilation, heating and air conditioning systems without the risk of explosion, where the effects of weather conditions are not directly applied, not intended for forced heat and flue gas removal.

applicant: **MANDÍK, a.s.**  
Dobříšská 550, 267 24 Hostomice, Česká republika IČ: 26718405

manufacturer: **MANDÍK, a.s.**  
Dobříšská 550, 267 24 Hostomice, Česká republika IČ: 26718405

it reviewed the documents submitted by the applicant, performed the initial type test on the sample, assessed the applicant's factory production control system and found that the aforementioned product fulfils the requirements of the construction technical certificate 227-STO-14-0552 which relate to the essential requirements.

The authorized body found that the applicant's product control method is in accordance with the respective technical documentation and ensures that products placed on the market fulfil the requirements of the aforementioned construction technical certificate and are in compliance with the technical documentation according to § 4 paragraph 3.

An integral part of this certificate is Protocol No. 227-P5-14-0552 of 29.11.2014 which contains the conclusions of the assessment, verification, test results and a basic description or illustration of the certified product necessary for its identification.

This certificate shall remain valid for as long as the requirements laid down in the construction technical certificate to which reference has been made or the manufacturing conditions at the place of manufacture or the factory production control system do not change significantly.

The Authorized Body No. 227 performs at least once in 12 months surveillance of due functioning of the applicant's product control, takes samples in the factory, performs testing on them and assesses, whether the product properties are in accordance with the construction technical certificate according to § 5 paragraph 4 of the aforementioned government regulation. In case the authorized body identifies deficiencies it is entitled to cancel or change this certificate.
